Professional Summary

Detail-oriented Computer Science Engineering student with hands-on experience in Generative AI, Large Language Models (LLMs), Full-Stack Development, and AI-powered applications. Strong written and verbal communication skills in English with proven ability to analyze, evaluate, and improve AI-generated outputs. Skilled in logical reasoning, problem-solving, testing, debugging, and structured documentation. Quick learner with a proactive mindset and high attention to detail, capable of working effectively in fast-paced and evolving environments. Passionate about AI systems, prompt engineering, chatbot evaluation, AI operations, and continuous improvement.

Internship Experience

Generative AI Intern, 10/2025 – 10/2025

AdroIT Technologies – Innovative Solutions Pvt. Ltd. (Oracle Partner)

- Worked with Generative AI concepts, Large Language Models (LLMs), and AI-powered applications.
- Evaluated AI-generated responses and analyzed output quality across multiple scenarios.
- Researched ethical AI deployment and responsible AI practices in Oracle Cloud environments.
- Performed testing and validation of AI use cases including content generation, code generation, and data analysis.
- Documented findings, observations, and improvement opportunities for AI workflows.
- Gained exposure to prompt engineering and AI response evaluation techniques.

Full-Stack Developer Intern, *VEI Technologies* 02/2025 – 03/2025

- Assisted in designing and testing RESTful APIs using Node.js and Express.js.
- Contributed to MERN-stack feature development with emphasis on responsiveness and usability.
- Collaborated using Git and GitHub for version control and team development workflows.
- Participated in debugging, troubleshooting, and testing software modules.
- Worked closely with development teams to improve application performance and reliability.

Education

Bachelor of Engineering (B.E.) – Computer Science and Engineering, 05/2027

Karpaga Vinayaga College of Engineering and Technology (KVCET)

Relevant Coursework: Artificial Intelligence, Data Structures & Algorithms, Database Management Systems, Software Engineering, Web Development, UI/UX Design

Chengalpattu, Tamil Nadu

Technical Skills

Artificial Intelligence & Analytics

- Generative AI
- Large Language Models (LLMs)
- Prompt Engineering
- AI Output Evaluation
- Chatbot Testing
- Scenario-Based Testing
- AI Response Analysis

Full-Stack Development

- MongoDB
- Express.js
- React.js
- Node.js
- REST APIs

Tools & Platforms

- Git & GitHub
- Figma
- Oracle Cloud Basics
- Windows Operating Systems

Programming Languages

- Python
- JavaScript
- C
- C++

Web Technologies

- HTML5
- CSS3
- Responsive Design

Core Competencies

- | | |
|--------------------------------------|------------------------------|
| • English Communication | • Logical Reasoning |
| • Critical Thinking | • Analytical Thinking |
| • Problem Solving | • Prompt Evaluation |
| • Attention to Detail | • Structured Documentation |
| • Quality Assurance Testing | • Requirement Analysis |
| • Team Collaboration | • Time Management |
| • Adaptability & Continuous Learning | • Ownership & Accountability |

Projects

KVCET CSE Department ERP System

- Developed a role-based ERP platform for Students, Faculty, Class In-Charge, and HOD.
- Designed modules for attendance tracking, academic management, complaints, circulars, and analytics.
- Implemented authentication, dashboard workflows, and structured data management.
- Participated in requirement gathering, testing, debugging, and workflow optimization.
- Tech Stack: Next.js, React.js, Node.js, Express.js, MongoDB.

AI-Powered Expense Tracker (Kaasu Kanakku AI)

- Designed an AI-assisted personal finance management platform.
- Structured conversational AI workflows for financial insights and recommendations.
- Evaluated AI-generated responses and improved user interaction flows.
- Developed expense tracking, analytics, and reporting functionalities.
- Focused on AI response quality, usability, and workflow efficiency.

ID Card Generator Pro

- Built a bulk ID card generation application with Excel integration.
- Automated template mapping, image processing, and batch card generation.
- Implemented validation checks and export automation workflows.
- Reduced manual effort through process optimization and automation.

NEXUS GO – Travel Booking & Location Tracking Platform

- Designed complete UI/UX workflows using Figma.
- Created wireframes, user journeys, and high-fidelity prototypes.
- Optimized booking flow and improved overall user experience.
- Built reusable design systems for efficient developer handoff.
- Applied user-centered design principles and usability testing.

AI Chatbot Evaluation & Prompt Testing

- Designed and tested prompts for conversational AI systems.
- Evaluated AI responses across multiple user scenarios and edge cases.
- Identified inconsistencies, logical gaps, and response quality issues.
- Documented findings and recommended prompt improvements.
- Focused on prompt engineering, testing methodology, and AI behavior analysis.

Achievements

- Completed Generative AI Internship with an Oracle Partner Organization.
- Developed practical experience in AI evaluation, prompt testing, and LLM-based workflows.
- Built multiple full-stack and AI-focused applications.
- Gained hands-on experience in MERN Stack, AI systems, and workflow optimization.
- Demonstrated strong analytical, communication, and problem-solving abilities through projects and internships.

Career Objective

To build a career in AI Strategy & Operations by leveraging my technical background, analytical thinking, prompt engineering knowledge, and problem-solving skills to contribute to the development, evaluation, testing, and continuous improvement of AI-powered products and systems.
